

Ceramic aromatherapy diffuser

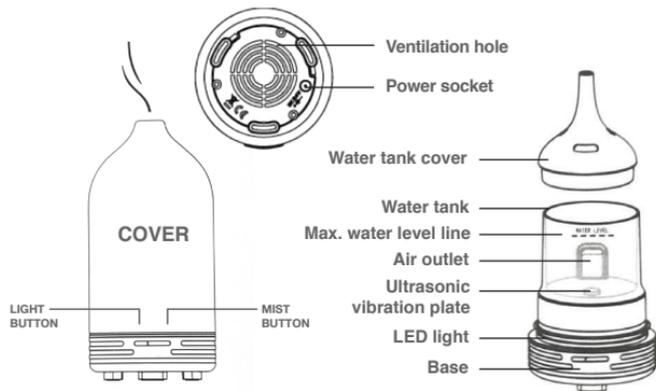

INSTRUCTION MANUAL

The Ceramic Aromatherapy Diffuser uses ultrasonic waves to vaporise water and essential oils to produce a cool, aromatic mist.

Create an aromatherapy haven with certified organic pure essential oils and the world's best aromatherapy blends from Perfect Potion.

Specifications	
Model: Ceramic Aromatherapy Diffuser	Electricity consumption: Approx. 12W
Colour: Black or White	Tank capacity: 120mL
Dimensions: 90mm (D) x 188mm (H)	LED light: 3 bulbs
Weight (net): Approx. 580g	Materials: COVER: Ceramic; BASE: ABS; TANK: PP; O-RING & NECK-RING: Silicone.
Power Input / Output AC100–240V 50/60 Hz DC24V 0.5A	Accessories: Power cable, user manual
Length of cable: Approx. 1770mm	Method of mist production: Ultrasonic vibration at approx. 30ml/hr
Diffusion time Continuous mode – up to approx. 4 hours. Intermittent mode – up to approx. 8 hours.	Made in China

How to use

1. Sit the diffuser in an upright position and remove the outer ceramic cover. Remove the water tank cover and attach the power cable to the base [main body] of the diffuser.
2. Fill the water tank with clean room temperature water. Do not exceed the max. water level as indicated on the water tank. Do not refill with water while in operation.
3. Add 3 – 5 drops of pure essential oil into the water tank.
4. Replace the water tank cover and ceramic cover.
5. Plug the power cable into the power supply.

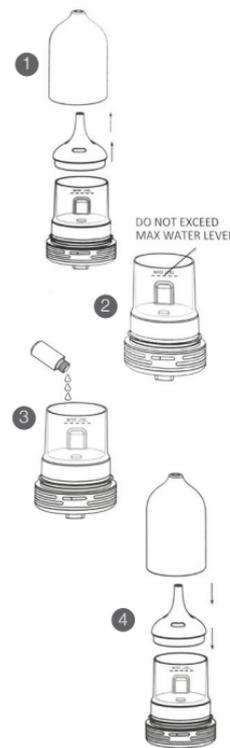

To operate the MIST function

6. **For continuous mist:** Press the MIST button (right) once; the mist will start dispersing in continuous mode.

For intermittent mist: Press the MIST button a second time, the diffuser will start dispersing in interval mode (30 seconds on/30 seconds off).

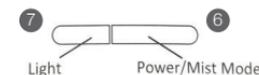

Turn device off: Press the MIST button a third time, the diffuser will turn off.

Diffuser will automatically turn off when the water level is too low.

To operate the LIGHT function

7. First push to turn on bright light.
Second push to activate dim light.
Third push to turn off light.

Read before use

Please follow the below precautions to avoid malfunction.

1. Do not block the air intake on the base of the diffuser.
2. Use only with pure essential oils.
3. Do not fill over max line at any time.
4. Use clean water only. Do not use mineral water, sparkling water, etc.
5. Do not switch on power when the tank is empty.
6. Do not scratch the ultrasonic vibration plate.
7. Clean regularly following the cleaning instructions to avoid malfunctioning.
8. Always unplug from power supply before maintenance.
9. After each use, pour away remaining water from the opposite side of the air outlet and rinse.
10. If you are not using the diffuser for long periods of time, drain the water from the tank and wipe dry.
11. Essential oils can stain. In the event of spillage, wipe away with a soft cloth immediately.
12. Use a clean cup, jug or bottle to add water to the tank. Never fill directly from the tap.
13. Do not let mist blow directly onto furniture, clothing, walls, etc.
14. Keep away from direct sun, heat sources, air conditioners or fans.
15. Keep away from electronics.
16. Always keep on a stable, flat surface. Do not place on carpet, bed or any unstable areas.
17. Do not tip the diffuser when in use. This may cause water to enter the mechanism and cause malfunctioning.
18. Never move the unit when in use.
19. Do not touch any part of the diffuser with wet hands.
20. Keep out of reach of children and pets.
21. Keep power cable clear of pathways and do not pull forcefully.
22. Use only with power cable supplied.

Troubleshooting

Please refer to the table below in the event of the diffuser operating abnormally.

Issue	Solution
No power	Check the power cable is connected correctly.
Water leakage	Always make sure the covers are properly installed. Make sure the unit has not been tipped over. If the temperature is too low or humidity is too high the mist might condense and water droplets form.
No mist/ abnormal mist	The amount and intensity of mist produced will vary, but this is not unusual and should not be considered a fault. Check that the power cable is connected properly. If unsure, remove the power cable and reconnect. Check that there is adequate water in the water tank. If empty, the diffuser will not mist. Also, if the water level exceeds the max water level line, the mist will not disperse. Clean the ultrasonic disc as instructed in the cleaning instructions.
LED light not turning on	Take note that the LED light turns off when the diffuser shuts off automatically.
Smoke or burning smell	Turn off at the wall and unplug immediately.

Cleaning & maintenance

We recommend that you clean the diffuser every time you change oils:

1. Before cleaning, switch the unit off and unplug it.
2. Remove cover.
3. Pour out any remaining water from the opposite side of the air outlet (Fig 1).
4. Rinse the tank with clean water.
5. Wipe tank with a soft, clean, damp cloth.
6. Use a cotton bud to gently clean the ultrasonic vibration plate if required.

To clean cover

1. Clean using a soft cloth and clean water.

Accidental Leakage

In the event of the diffuser being knocked over or tipped during use, please follow these steps to avoid malfunction.

1. Turn off at the power supply, unplug the unit and remove the cover.
2. Pour out any remaining water as shown direction (Fig 1). Do not empty water from Air Outlet side.
3. Shake the unit gently to drain any water inside the mechanism and allow to dry for 24 hours before use.

PLEASE NOTE:

- Never immerse the unit in water or let water enter the air outlet.
- Keep dry when not in use.

Warranty

Electrical products come with a 12 month warranty from date of purchase as per manufacturer's guarantee. Faulty electrical products must be returned to place of purchase or sent directly to Perfect Potion's Head Office based in Banyo, Queensland. For returns from our stores, please allow one (1) week transfer and two (2) working days for testing upon receipt at our head office.

If your electrical product is deemed to have a major fault, we will contact you so that you can elect your option of a refund or replacement. If it is deemed to have a minor fault, it will be repaired or replaced then sent directly back to you. If your product is found not faulty, you may be charged to have it returned to you.

There will be no refund or exchange on your electrical product until it has been tested by Perfect Potion's Quality Assurance department. If you require further information, please contact the Office of Fair Trading or Consumer Affairs in your state.

You may choose to receive a refund, exchange or credit where the product is faulty, wrongly described, different from a sample shown to you or does not do what it is supposed to do. Perfect Potion products must be returned as soon as possible, accompanied by the original purchase receipt.

This warranty does not cover any damage caused by accident, misuse or damage resulting from failure to care and maintain this device as specified in these instructions.

We do not give refunds for change of mind, wrong selection or unwanted gifts. We do not resell returned products in order to ensure product integrity.
